Purpose

The purpose of this report is to present the 2020/21 annual statistics for the Town's existing CCTV systems, as per the requirements of the Closed Circuit Television (CCTV) Management & Operational Manual.

Background

In April 2012 (OCM-10/4/2012), Council adopted the Closed Circuit Television (CCTV) Management & Operational Manual. This document provides for the annual reporting of listed items to keep the Town updated on the effectiveness of CCTV installations throughout Council owned facilities.

The Manual states that *'CCTV Management Practices establish the operational objectives and reporting indicators for CCTV Operations, with a focus on nominated outcomes relevant to camera locations and other defined target areas'*.

Key indicators include the number of requests for footage, the time taken in responding to requests for footage, the number of requests for maintenance and the time taken to repair systems.

This data allows for the Town to quickly identify trends concerning fundamental operations, which may require early intervention or closer monitoring.

This information can then be used to determine if the installation is still necessary or if it has served its purpose in reducing reportable incidents in the area and can be re-installed elsewhere if needed.

It should be noted that the Town is in the process of reviewing the Manual, which will likely be the subject of a further report to Council.
