2022

Djeran season at last sees a break in the really hot weather. A key indicator of the change of season is the cool nights that once again bring a dewy presence for us to discover in the early mornings.

The winds have also changed, especially in their intensity, with light breezes being the go and generally swinging from southerly directions (i.e. southeast to southwest).

Djeran is a time of red flowers especially from the Red flowering gum (*Corimbia ficifolia*), as well as the smaller and more petite flowers of the Summer Flame (*Beaufortia aestiva*). As you travel around the Perth area, you may also notice the red 'rust' and seed cones forming on the male and female Sheoaks (*Allocasuarina fraseriana*). Banksias start to display their flowers, ensuring that there are nectar food sources for the many small mammals and birds that rely upon them.

As the season progresses, the nights will become cooler and damper along with some cool and rainy days which also means that traditionally mia mias (houses or shelters) were now repaired and updated to make sure they were waterproofed and facing in the right direction in readiness for the deep wintery months to come.
