

CCTV Rebate Scheme 2025/26

Closed circuit television (CCTV) is a useful tool in the detection and investigation of community safety and crime problems. The Town of Bassendean has developed a rebate scheme to increase the number of CCTV systems in the Town and to assist the WA Police Force in keeping the community safe.

Terms and Conditions

- The Town will rebate 50% of the total cost of a new CCTV system, up to \$200 per project.
- The rebate will only apply for new installations.
- Applications would only be accepted up until the budgeted funding is depleted.
- Rebate applications will be limited to one per household.
- Holders of a Western Australian Seniors Card will be ineligible for the Town of Bassendean Residential CCTV Rebate program on the basis that they can access incentives via the WA State Safety and Security Rebate scheme.
- Prior to receiving a rebate, applicants are required to demonstrate (via the submission of high-quality screenshots) that the new CCTV system has a public angle field of view overlooking a road, footpath, front verge, or any other applicable public area, to the Towns's satisfaction.

What is Cam-Map WA?

Cam-Map WA is a website to register public facing CCTV cameras. This register will assist police to locate public facing cameras during investigations, help with the collection of CCTV evidence and respond more effectively to incidents as they arise.
