---

## **WILDING, Emily**

I am a dedicated youth and community worker, supporting vulnerable people in and around our area. I believe that local governments should hold the health, wellbeing, and happiness of residents as a core priority, and that decisions should be made with this focus. I have previously lobbied local governments to address critical gaps in current programs to ensure we aren't leaving people in our community behind. I want to preserve and activate our local green spaces. I want to ensure current council policy of low rates while maintaining crucial services continues. I want to tackle crime through community awareness and diversionary programs. I want to make accessibility a priority in our town on behalf of those with disability or mobility limitations. Finally, as a young person, I want to tackle our harrowing suicide rate by building a town that makes decisions with the wellbeing of all residents in consideration.
