

Asset Services Information Sheet 18

Availability of Mulch

Introduction

Street trees located under power lines within the Town of Bassendean are pruned on an annual basis. The pruning from these trees are recycled as mulch through the Council Depot and are available to residents and community groups of the Town.

Availability of Mulch to Residents

Residents may collect mulch from a fenced-off area behind the Depot (access from Scaddan/Troy intersection), maximum 6 x 4 trailer. (subject to availability of mulch)

There is no requirement for residents to report to the Depot office, as the area is left open to allow residents to help themselves. Mulch is available 7 days a week.

Currently the delivery of mulch is unavailable to residents.

Availability of Mulch to Community Groups

Mulch is available to community groups (schools, churches, etc.) within the Town free of charge. Requests for mulch should be made in writing to the Executive Manager Infrastructure, PO Box 87, Bassendean, WA 6934. Requests will also be accepted via email to mail@bassendean.wa.gov.au. Community groups may collect the mulch themselves from the Council Depot (subject to availability of mulch) or request delivery (free of charge).
